

DEATH OF DR. DALBY.

ALL THE SHOCK of a bereavement that is personal will come to many Salt Lake people as they read of the death of Dr. William T. Dalby, which occurred in this city at 7:30 o'clock yesterday morning at his home. After many weeks of suffering from a disease that, from the outset, seemed incurable, relief has come. Patiently, bravely, with the quiet heroism that is a part of the character of such as Dr. Dalby, he bore his suffering calmly and bravely until the inevitable.

Dr. Dalby was more than ordinarily prominent in Salt Lake City. For four years, from 1894 to 1898 he was health officer and his record in that position was of the best. The good work of his predecessors was amplified and enlarged, and he left the health department at the close of his second term in splendid shape for those who were to follow him. Dr. Dalby's ability as a physician was never questioned or his standing disputed, but it was not that alone that won him friends and patients.

The Herald were to name his chief characteristics it would call attention to his never-failing courtesy, his readiness to respond to the call of charity, his generosity to his friends, the beauty of his home life. The sorrow that has come upon his wife and his little child is unspeakable. To Mrs. Dalby The Herald extends its sincerest sympathy. Her loss is one too great for condolence, though she has at least the drop of comfort contained in the thought that for her beloved there is no more labor, neither sorrow nor suffering.

He has entered into a rest that is fully earned, fully deserved. And there is for the widow the remembrance of the joy of knowing and loving this man. May she be comforted in the dark hour and sustained by the thought that there is a reward for the worthy and that her beloved has entered into his share of it.

ANOTHER PEARY DASH.

FROM WASHINGTON comes the announcement that Commander Peary of Arctic fame has been granted another three years' leave of absence for the purpose of making one more dash for the north pole. Between now and July next he will be busy fitting up an expedition with all the supplies and equipment that his former experiences have shown to be necessary. A relief ship will, of course, also be provided for.

We confess we haven't a great deal of sympathy for these dashes to the pole, or toward the pole, to speak more literally. Suppose Commander Peary does find the pole and suppose, figuratively, he hoists the American flag to its summit. Will anybody be the wiser, thereby except Commander Peary, who would, in such an event, be eagerly sought after as a lecturer? Does anybody suppose that at or near the pole is a land that can be occupied by human beings?

If all the conjectures of scientists are true the north pole is either in the Arctic sea or an uninhabitable island of that sea. Even if it should be found on an island and if the island should be the most beautiful land in the world, the difficulties attendant upon reaching it would preclude the possibility of making it available for any purpose whatever. Materially, therefore, there is no possible good to the world in the discovery of the north pole. Yet for it, the heretofore untold hardships, men have braved incredible hardships, they have starved and frozen and died.

It is impossible for any to foretell the result of Peary's next expedition. It may be successful and it may not be. As he is an American citizen let us hope he will win, for he certainly deserves to win, if ever a man did. And when he gets the pole we trust he will chop it down and bring it back to this country with him for exhibition purposes and for the purpose of preventing some of our gallant adventurers from risking their lives in a search for it.

Surely it will be much more comfortable for us to go to some nicely warmed museum and look at the pole than for us to be compelled, every time we feel the pole hunger, to go chasing away up north after it, subject to the risks and privations that go with a journey to the far north.

The palmist succeeded in doing what many others have failed to do, when he induced Mayor Thompson to show his hand—Salt Lake Tribune.

As we understand it Mayor Thompson has never displayed any reluctance to show his hand at the psychological moment. This, however, may be the first time he has shown it without being paid.

"Almost any street car motorman or conductor or newspaper man or railroad man will tell you that Labor day was most enjoyable to him. He only had to work a shade harder than on other days. Labor day is really and truly Labor day to lots of people."

Our minister to Colombia still "as" poses that the canal treaty will be ratified, but he isn't able to give us any information to justify them. We had better give Panama up as a bad job right away and start work on the Nicaragua project.

This time next week Ogden will be busy with the irrigators and the irrigators will be busy with Ogden. That all concerned will have a pleasant and profitable time goes without saying.

Bulgaria gives it out cold that she doesn't want to fight, but coupled with the announcement is the intimation that if a fight is forced upon her the other party will know it has been in one.

The resorts having practically all closed their doors will be a place for a lot of people to go except home. And the change will doubtless be a good thing for them.

Well, the "good old summer time" has now been hit a jolt that ought to hold it for a while—say until about next July.

Mr. Monroe has concluded that he will fight Mr. Jeffries, after all, which is doubtless very gratifying to Mr. Jeffries.

SPARKS.

Did you ever notice how many women get into the seats in the rear end of street cars, reserved for smokers while there is plenty of room further forward, and then shift and look mad because some poor man smokes in front of them?

In their anxiety to prevent the spread of typhoid, the sprinkling cart drivers discontinued the placing of germ-laden water on the dusty streets of Salt Lake.

If the question of experience and fitness really gets to figure much in consular appointments, certain estates are going to have trouble in paying off in patronage their faithful henchmen. It may even get so that a man will be required to know what job he is getting before he is appointed.

No reasonable person could complain of the Denver grand jury which returned practically every offense in the town.

If the light takes place at the scheduled time it is a safe bet that one Jack Sumner of Salt will pass from public view about Oct. 18 next.

Those who take part in Labor day parades no doubt feel that the occasion is appropriately named.

A local resort is advertising a perfumed woman, and those who enjoy getting stony stares from ladies will find here an opportunity.

One of the marvels of the world is that a man can get enjoyment out of drinking a lot of stuff that will cause him to have a terrific headache, to say nothing of other pains, the following day.

Song of the Weather Man.

"The grievous job to please the mob When it comes to making weather. For when the sun is shining bright, I can't bring rain together. For when the sun is shining bright, I can't bring rain together. For when the sun is shining bright, I can't bring rain together."

When the sun comes out I hear a shout Because it is not raining. When it comes a storm, like an angry swarm Of bees, I hear complaining. When the heavens are clear I am filled with fear. When the sky is overcast I rush madly past. When the sun is shining bright, I do not expect a word of commendation. When the sun is shining bright, I do not expect a word of commendation. When the sun is shining bright, I do not expect a word of commendation."

The Turkish troops have already killed some hundreds of people, burned some villages and captured everything they could, but the sultan has not yet decided to begin offensive operations.

If, as reported, the Panama canal treaty is practically dead, a fine opportunity will be afforded some of our statesmen to repeat statements previously made in regard to our "international relations." Having become since the late war with Spain a world power, etc.

That Danville, Ill., sheriff who, with his ill-fated "best citizens" and citizens' committee, of the mob that attacked the jail and sent them to the penitentiary, might as well prepare to take up some useful pursuit in unofficial life after his present term runs out.

In Kansas City they also have a typhoid epidemic and are blaming the recent floods for it, claiming the disease is traceable to the water from springs and cisterns used after the overflow.

Some men have to get arrested for drunkenness and disorderly conduct and come around to get the facts kept out of the paper before they really appreciate the importance of the newspaper man.

The Emery County Progress-Review says: "The hum of the threshing can be heard in our city. It does not hum 'Hawatha' let it lie."

From London comes a proposition to have Canada try to capture the cup next time. That would come as near settling the international supremacy as any of the Long Island Yacht club could talk the trophy from the New York Yacht club.

The glue makers have struck. They ought to hang together and make it stick.

The announcement that the victory of Reliance is not unexpected on the other side comes as further proof that the two great nations are very close together in thought. The victory was not unexpected on this side.

The Turkish railroads appear to know their royal master's rating in the commercial agencies, and have demanded that the rest of transporting his soldiers be paid in advance.

Has a Title Himself.

While Major Charles Stanton was moving about the streets greeting old friends the other day he encountered a man named Kearns, and something like the following took place:

"Hello, Tom!"

"Hello, Charley!"

"What do you call me now, Tom?"

"Well, they call me both Tom and Charley, but I am the senator, you know."

"To be sure."

"Well, how's everything, Charley?"

"Excuse me—major, if you please, I am the major, you know."

There is every reason to believe that if Mr. Jack Monroe would consent to meet Mr. Jeffries at once Mr. Monroe would save the expense of training and would not materially affect the outcome of the contest.

So it appears that Cardinal Gibbons is not to be expelled from France for minding his own business.

SOCIETY.

Yesterday at the Country club the men played the first tournament in the contest for club championship. A buffet luncheon was served and a number of the members from town were out to enjoy the afternoon.

Miss Violet Neill arrived yesterday from Denver, after having spent the past six months visiting in the east.

Miss Anne Starling, who was employed as a teacher at Rowland Hall last year, is expected to return from her home in Kentucky today. She will be accompanied by her sister, Miss William Starling, who will have charge of the intermediate department of the school. Two other new teachers at the hall are Miss Russell of Burlington, Vt., and Miss Farnham of the Emerson school of Boston, who will have charge of the physical culture at the hall.

Mr. and Mrs. Sheppard A. Benson returned yesterday from a brief visit with Mrs. Benson's parents in Denver.

Mrs. E. E. Shepard and her daughter, Miss Helen Shepard, will return Thursday from Nevada, where they have spent the summer with Mr. Shepard.

Mrs. M. A. Ellerbeck and daughters are home from Brighton and are again at 788 First street.

Mr. and Mrs. H. E. Cary have returned from Caryhurst near Provo, after spending the summer there.

The Misses Ethel and Lizzie Macdonald entertained yesterday afternoon at a very pleasant party for Miss Carrie Knapp. The affair was arranged by a handkerchief shower and the bride-elect received many handsome gifts of the useful kind from her girl friends, a great number of whom were present.

Mrs. Bertie Snodgrass, who has spent the summer in California, returned Saturday evening to the city.

Mr. and Mrs. J. F. Grant spent Sunday in Ogden visiting relatives and friends.

Colonel and Mrs. Isaac Trumbo are in the city visiting Mr. and Mrs. Edward McGurran.

Mr. and Mrs. Lawrence Greene and children are home from Brighton.

Judge and Mrs. H. H. H. of New York, who have been at the Knutsford for the past few days, left last evening for Heber, where they will spend a fortnight with friends.

Miss Kate Mackenzie is at home at the Mankito.

Mrs. M. C. Wyndham of New York arrived last evening and will spend the winter with her daughter, Mrs. Agnes Osborne.

Miss Jane Mackintosh will be at home in her studio tomorrow afternoon.

Mrs. Heber Mitchell entertained at a Kensington Friday afternoon in honor of Miss Lillian Swift, who departs for Gallatin college in a few days. The solo were sweetly rendered by Miss E. James and Miss Edna Evans. Piano selections by Miss Evans, Louis Bull and Miss Ida Mitchell. Those present were Mr. and Mrs. Farr, Mrs. L. White, Mrs. J. Jensen, Mrs. M. Horrocks, Mrs. M. Jensen, Mrs. F. Ford, Mrs. A. M. Quarrie, Mr. and Mrs. E. Solomon, Mr. and Mrs. J. Graham, Mrs. S. Horrocks, Miss Tate, Mr. and Mrs. W. Warburton, Mr. and Mrs. E. M. Cook, Mrs. L. Horrocks, Mrs. Evans, Raboult Christensen.

UNIVERSITY OF UTAH.

The University of Utah includes the School of Arts and Sciences, the State School of Mines, and the State Normal School.

SCHOOL OF ARTS AND SCIENCES.

The School of Arts and Sciences offers courses in:

1. General Science.
2. Liberal Arts.

STATE NORMAL SCHOOL.

The Normal School offers:

1. A four-year Normal Course.
2. Advanced Normal Courses.
3. Courses in Kindergarten Training.

STATE SCHOOL OF MINES.

The School of Mines offers courses in:

1. Mining Engineering.
2. Electrical Engineering.
3. Civil Engineering.
4. Mechanical Engineering.

PREPARATORY SCHOOL.

A Preparatory School is maintained, which gives preparation for the courses in General Science, Liberal Arts, the Engineering Courses, Law, Medicine, and Business.

The Shops and the chemical, physical, electrical, mechanical, assaying, and metallurgical laboratories are unsurpassed in the completeness of their equipment.

The proximity of great mines, reduction works of various kinds, and power houses for the generation of electricity affords unexcelled advantages for thorough and practical work in all the engineering courses.

MANUAL TRAINING AND DOMESTIC SCIENCE are features of the normal courses.

Entrance examinations, September 9th, 10th, and 11th. Registration of students, September 11th and 12th.

Students will be assisted in finding suitable boarding places.

Annual registration fee, \$10. No tuition.

Send for catalogue and illustrated circular and learn what excellent opportunities the University offers for a broad, liberal, and practical education.

UNIVERSITY OF UTAH, Salt Lake City.
